Karawang, Jawa Barat

PROFILE

Fresh graduate in Information Systems from Universitas Singaperbangsa Karawang with experience as a Web Developer Intern at the Communication and Informatics Office of Purwakarta Regency. Experienced in building web applications using React.js, JavaScript, Bootstrap, and CSS, as well as integrating front-end interfaces with back-end systems and streaming services. Familiar with the application development process from UI/UX and development to testing and deployment.

EDUCATION

Universitas Singaperbangsa Karawang — Bachelor of Information Systems

Sept 2022- Aug 2026

GPA: 3,92 / 4,00

PENGALAMAN PROFESIONAL

Intern — Dinas Komunikasi dan Informatika Kabupaten Purwakarta

Aug 2025 – Jan 2026

- Built and enhanced the PAPAIS CCTV monitoring website using React.js, Bootstrap, and CSS, including HLS-based live CCTV streaming integration.
- Designed responsive and user-friendly interfaces to improve accessibility for internal government users.
- Developed CRUD features for the UPTD Puskesmas Kota website, supporting the delivery of public healthcare services.
- Performed independent application testing and debugging before release to users.
- Collaborated with developer and IT teams on government digital transformation projects and prepared technical documentation.

Mentee — IBM Hybrid Cloud & Red Hat (Infinite Learning Indonesia)

Sep 2024 – Des 2024

Independent Study at Kampus Merdeka (MSIB) Batch 7 · Batam, Kepulauan Riau · Remote

- Gained Linux system administration experience through Red Hat System Administrator I & II training, covering file management, network configuration, SELinux, and LVM-based storage.
- Developed a Disaster Recovery Plan for Linux servers using Relax-and-Recover (ReaR), including automated backup and rapid recovery mechanisms for ransomware attacks and system failures.
- Developed and deployed cloud-based applications, including WeatherApp on IBM Cloud, as part of cloud computing exploration.
- Applied Agile and SCRUM methodologies to manage project tasks and roadmaps efficiently.
- Collaborated on individual and team projects to solve technical challenges and strengthen communication, adaptability, and analytical skills in IT.

SELECTED PROJECTS

ArangHaki (Aplikasi Barang Habis Pakai)

2026

Fullstack Developer

- Developed a web-based office supplies inventory information system using CodeIgniter 4 and MySQL to manage item data, stock, and usage history.
- Implemented CRUD features, user access control, stock opname, and online office supplies requests.
- Conducted Black Box Testing and User Acceptance Testing (UAT) to ensure system functionality and user acceptance.

PAPAIS CCTV (Website Pantauan Purwakarta Istimewa)

2025

Front-End Developer

- Collaborated with the team to develop the web-based CCTV monitoring interface using React.js.
- Implemented camera management, camera lists, location maps, and video monitoring features.
- Integrated HLS technology to support CCTV streaming playback.
- Performed system testing and deployment preparation with the development team.

UPTD Puskesmas Kota — Website Layanan Kesehatan

2025

Web Developer

- Developed a healthcare services website using CodeIgniter 4 and MySQL.
- Designed a responsive interface to improve access to information.

- Developed an admin dashboard for managing news, services, galleries, and agendas.
- Tested website functionality and responsiveness across multiple devices.

SISKEUDES Remote — Sistem Akses Jarak Jauh

2025

IT Infrastructure Support

- Developed a web admin panel for managing SISKEUDES remote access using Node.js and Express.js on the back end.
- Developed the interface using HTML, CSS, Vanilla JavaScript, and HTMX.
- Implemented user management, RDP/SSH connections, user-to-connection mapping, and dashboard statistics.
- Integrated MySQL as the database for user and connection management.

Monitoring Dashboard — Looker Studio

2025

Data Visualization

- Built an IT infrastructure monitoring dashboard using Looker Studio to visualize and present data clearly.
- Developed Subdomain & OPD Data, Issue Classification, and Server Infrastructure Monitoring dashboards to support infrastructure monitoring.

Website Dinas Komunikasi dan Informatika Kabupaten Purwakarta

2025

UI/UX Designer

- Designed the Diskominfo website UI/UX with a focus on information structure, navigation, and usability.
- Created wireframes and interface designs for website pages.
- Developed responsive and consistent visual layouts according to government website requirements.

Centralized Server Log Management — Rsyslog

2024

System Admin Developer

- Designed a centralized server log management system using Rsyslog to collect and manage logs from multiple RHEL servers.
- Implemented Rsync, Logrotate, FirewallD, and log encryption and storage mechanisms to improve server security and management efficiency.

SERTIFIKASI

Infinite Learning – Kampus Merdeka MSIB Batch 7

2024

- Completed the IBM Hybrid Cloud & Red Hat Mentee program, with learning in cloud computing, Linux, and Red Hat technologies.

BPPTIK VSGA (2023): Junior Graphic Designer (JGD)

Oktober 2023

- Earned national competency certification as a Junior Graphic Designer, with skills in graphic design, layout, typography, and visual element processing.

PENGALAMAN ORGANISASI

BEM Faculty of Computer Science — Communication & Information Division, Media Department

2024

- Managed BEM Fasilkom event publications, produced print and electronic media, and developed event publication SOPs.

Organisasi Fotografi Kampus UNSIKA — Humas Eksternal

2023

- Built external relationships and partnerships, managed social media communications, and supported media partner and benchmarking activities..
