

SILMI YUSHINI

FRONT-END WEB DEVELOPER

+62 813-8422-7133 | silmiyushini1919@gmail.com | Karawang, West Java, Indonesia

PROFILE

Fresh graduate in Information Systems from Universitas Singaperbangsa Karawang (GPA 3.92/4.00) with experience as a Web Developer Intern at the Department of Communication and Informatics (Diskominfo) of Purwakarta Regency. Experienced in building web applications using React.js, JavaScript, Bootstrap, and CSS, as well as integrating front-end with back-end and streaming services. Understands the full application development process, from UI/UX, development, and testing, to deployment.

KEY SKILLS

Front-End: HTML, CSS, JavaScript, React.js, Bootstrap

Back-End Basics: PHP, MySQL, CodeIgniter

Design & Prototyping: Figma, Canva, UI/UX Design, Wireframing

Version Control: Git & GitHub

Infrastructure & Tools: Cloudflare DNS, Apache Guacamole, Looker Studio, Basic Linux

WORK EXPERIENCE

Intern — Department of Communication and Informatics (Diskominfo) of Purwakarta Regency Aug 2025 – Jan 2026

- Built and enhanced the PAPAIS CCTV monitoring website using React.js, Bootstrap, and CSS — including integration of HLS-based live CCTV streaming.
- Designed a responsive and user-friendly interface, improving accessibility for internal agency users.
- Developed CRUD features for the UPTD Puskesmas Kota website, extending the application's scope to public health services.
- Independently performed testing and debugging of applications prior to release.
- Collaborated cross-functionally with developer and IT teams on government digital transformation projects, and prepared technical project documentation.

Mentee — IBM Hybrid Cloud & Red Hat (Infinite Learning Indonesia)

Sep 2024 – Dec 2024

Kampus Merdeka Independent Study (MSIB) Batch 7 · Batam, Riau Islands · Remote

- Gained proficiency in Linux system administration through Red Hat System Administrator I & II training, covering file management, network configuration, SELinux, and LVM-based storage.
- Developed a Disaster Recovery Plan for Linux servers using Relax-and-Recover (ReaR), including an automated backup system and fast recovery from ransomware attacks and system failures.
- Developed and deployed cloud-based applications, including the WeatherApp project on IBM Cloud as part of cloud computing exploration.
- Applied Agile and SCRUM methodologies in project management to organize tasks and roadmaps efficiently.
- Collaborated on individual and team projects to tackle technical challenges, strengthening communication, adaptability, and analytical skills in the IT industry.

FEATURED PROJECTS

ArangHaki (Consumable Goods Management Application)

Fullstack Developer

- Developed a web-based application to manage consumable goods inventory, covering item registration, stock management, incoming/outgoing transactions, and usage history.
- Built the front-end, back-end, database, and CRUD features using CodeIgniter 4, applying MVC architecture.

PAPAIS CCTV (Pantauan Purwakarta Istimewa Website)

Front-End Developer

- Collaborated with a team to develop the PAPAIS CCTV website using React.js with a Golang back-end and HLS streaming integration for real-time CCTV monitoring.
- Developed responsive interfaces for the monitoring page, camera list, and video streaming.

UPTD Puskesmas Kota — Healthcare Service Website

Web Developer

- Developed a public health center website focused on optimal user experience and easy access to health information.

SISKEUDES Remote — Remote Access System

IT Infrastructure Support

- Implemented remote access for SISKEUDES using Apache Guacamole, enabling secure and efficient remote access.

Monitoring Dashboard — Looker Studio

Data Visualization

- Built comprehensive dashboards for IT infrastructure monitoring: Subdomain & OPD Data Dashboard, Issue Classification Dashboard, and Server Infrastructure Monitoring Dashboard.

Centralized Server Log Management — Rsyslog

System & Infrastructure Developer

- Designed a centralized server log management system using Rsyslog to collect and manage logs from multiple RHEL servers.
- Implemented Rsync, Logrotate, and FirewallD, along with log encryption and storage mechanisms to improve server management security and efficiency.

EDUCATION

Universitas Singaperbangsa Karawang — B.S. in Information Systems

Sep 2022 – Aug 2026

GPA: 3.92 / 4.00

CERTIFICATIONS

- Infinite Learning – Kampus Merdeka MSIB Batch 7 (Sep–Dec 2024): Mentee, IBM Hybrid Cloud & Red Hat.
- BPPTIK VSGA (2023): Junior Graphic Designer (JGD) — visual design & branding using Adobe Creative Suite.

ORGANIZATIONAL EXPERIENCE

Student Executive Board (BEM), Faculty of Computer Science — Koinfo Division, Media Department
Campus Photography Organization, UNSIKA — External Public Relations
